

ECMTUNE Handheld

Quick Start (PC Application)

NOTE: Do not plug-in ECMTUNE Handheld into the computer until ECMSYNC is installed

1. Download ECMSYNC:
www.global-auto-tech.com/download/ecmsync_install.exe
2. Navigate to the directory where you downloaded ecmsync_install.exe and double click the file. *(Please restart your computer, if prompted)*
3. Double click on the ECMSYNC Icon on the desktop.

4. Plug ECMTUNE Handheld into the USB port on your computer. Plug the other side of the USB cable into the ECMTUNE Handheld.

NOTE: Scroll and Enter buttons are not operational while the Handheld Device is connected to the PC.

5. ECMTUNE Handheld should display...

ECMTUNE
Handheld

6. Click the “Sync” button to check for updates/sync – this will download the tuning files to the ECMTUNE Handheld if they are available.

Handheld screen will display the following during the SYNC process...

Sync in
Progress

7. When synchronization is complete, unit will display...
